Paper 2

October/November 2016

2 hours 30 minutes

Candidates answer on the Question Paper.

Additional Materials: G

Geometrical instruments

Electronic calculator

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Section A

Answer all questions.

Section B

Answer any **four** questions.

If working is needed for any question it must be shown in the space below that question.

Omission of essential working will result in loss of marks.

You are expected to use an electronic calculator to evaluate explicit numerical expressions.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 100.

Section A [52 marks]

Answer all questions in this section.

Find the two possible values of $P\hat{Q}R$.

5

In the diagram, A and B are the centres of two circles that touch at P. The line ACT touches the small circle at T and intersects the large circle at C. D is the point on AB such that $C\hat{D}A = 90^{\circ}$.

(a) Complete the following, to show that triangle ACD is similar to triangle ABT.

In triangle ACD and triangle ABT

Because the three pairs of angles are equal, the triangles are similar.

(b) Given that the radii of the circles are $7 \, \text{cm}$ and $3 \, \text{cm}$, calculate CD.

(a) Find A + 2B.

Answer $\left[\begin{array}{c} \\ \end{array}\right]$ [2]

(b) Find AB.

Answer (2)

 $\mathbf{(c)} \quad \mathbf{A} \begin{pmatrix} x \\ 2 \end{pmatrix} = \begin{pmatrix} 8 \\ 2y \end{pmatrix}$

Find x and y.

Answer $x = \dots y = \dots [2]$

(d) Find \mathbf{B}^{-1} .

Section B [48 marks]

Answer **four** questions in this section.

Each question in this section carries 12 marks.

7 (a)
$$x = \sqrt{a^2 + b^2}$$

(i) Calculate x when a = -0.73 and b = 1.84.

Answer[1]

(ii) Express b in terms of x and a.

(b)

ABCD and PQRS are rectangles. AD = x cm and PS = (x + 5) cm. Each rectangle has an area of 17 cm².

(i) Write down an expression for PQ in terms of x.

Answer $PQ = \dots$ cm [1]
