MARK SCHEME for the May/June 2014 series

0680 ENVIRONMENTAL MANAGEMENT

0680/43

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	Page 2		Mark Scheme	Syllabus	Paper		
			IGCSE – May/June 2014	0680	43		
1	des	stroye	infrastructure; not enough money to rebuild; p d; trade suffers/ref. to poverty/eq. disease/ill destroyed; AVP;				
	(b) (i)	75/2	200 × 100; = 37.5;		[2]		
	(ii)	600;	625;		[2]		
	(iii)	pollii	nation/fertilisation/eq.;		[1]		
	(iv)	glob	ease in greenhouse gases/correctly named gas; re al warming; higher temperatures = more evaporat ept change in rainfall)		•		
	(v)		place in the open without obstructions/eq.; secured (in the ground); empty every 24 hours/same time of day; record volume of water;				
	(vi) tal		e drawn; for one week; headings;		[3]		
	(c) (i)		a monoculture; idea of pest resurgence; ref. to icide; increased costs; so crop not profitable;	o possible effect	s of [2]		
	(ii)	only small investment needed; coffee still being harvested/sold; time to learn about avocado and banana; time to get yield/harvest avocado and banana crop;					
	(iii)	saves money on pesticides; still able to sell coffee/eq.; climate unlikely to allow good Arabica harvests in the future/eq.; AVP;					
	(d) (i)	use map to locate farms; use a random/systematic method (or described); further details of method; to select at least five farms from each district;					
	(ii)	same information recorded from each farm(er) /eq./to give a representative sample;					
	(iii)	any	valid question about crops/crop yields/planting time	e/costs/size of fa	arm; [1]		
	(iv)	more	Iready diversified/growing other crops/eq. so kno e likely to have money to buy new plants; use wer;; AVP;	-			

	Page 3	5	Mark Scheme	Syllabus	Paper		
			IGCSE – May/June 2014	0680	43		
2	(a) (i)	lowest 1110–1115 and highest 1770;					
	(ii)	1740 – 1270 = 470 ÷ 1270 × 100; = 37.01; Allow ECF from part (i).					
	(b) (i)	they want to make money; use the money on infrastructure/schools/ hospitals/roads; reduce poverty;					
	(ii)	overburden removed; gold rich rock removed; gold extracted; waste and overburden returned; replanting/landscaping/eq.;					
	(iii)	dust; noise; visual pollution; disturb wildlife/drive some animals away; habitat destroyed; deforestation;					
	(iv)	less expensive; less dangerous; more profitable for company; and government;					
	(c) (i)	no jobs; no money; cannot support family; no other livelihood; would need to learn new skills; crime; drugs; family breakdown; migrate to urban areas; new location not safe/described; AVP;					
	(ii)	redu safe	and [2]				
	(d) (i)	-	er of working in mines/fatal accidents; breathing dust causes cancers; problems; blood poisoning; mercury vapour is toxic;		cers; [2]		
	(ii)	6;					
	(iii)	orientation; axes labelled;; plots;					
	(iv)	increase in blood mercury up to 41 years old then steady/eq.;					
	(v)	study showed most miners at risk/eq.; sample of 9 not representative/ reliable;					
	(e) (i)		<i>ber of plants</i> increase up to 14 then fluctuates/e <i>ber of species</i> increase up to 18 m then steady/ec		[2]		
	(ii)	plant numbers/species only reduced for the first 14–20 m/eq.;					
	(iii)	(iii) mercury may have washed downhill so shorter distance of pollution uphil eq.;					
	(iv)	(iv) two more surveys level with the site/eq.;		[1]			
		AVP = Alternative Valid Point.
