UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

0460 GEOGRAPHY

0460/43

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(d) Machinery

Capital / money
Fertilisers / pesticides / insecticides
High yielding seeds
Livestock / cattle
Buildings
Drainage / irrigation
Terracing

3 @ 1 [3]

(e) More sample sites; would increase reliability of averages/reliability of results / accuracy of average figures

Another transect on a different hillside / different farm; more data for analysis Repeat the investigation at different times of the year / seasons; comparison of results Interview/questionnaire farmer or different farmers; gain more details about evidence being collected

Investigate other factors which may help explanation: e.g. soil pH / texture weather variation – rainfall / temperature – up the hillside – 1 max

2 + 2 [4]
