MARK SCHEME for the May/June 2015 series

0460 GEOGRAPHY

0460/11

Paper 1, maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

F	age 2	Mark Scheme	Syllabus	Paper
		Cambridge IGCSE – May/June 2015	0460	11
1	(a) (i)	Asia		[1]
	(ii)	A. Europe; B. Asia	(2 × 1 mark) [2]
	(iii)	 Ideas such as: high birth rates/growth rates; education about family planning/sex education/contraception; lack of, cost of, access to contraception/family planning (max economic reasons for large families; high infant mortality; decreasing death rates/increased life expectancy; investment in health care/vaccinations/better, more doctors/nubetter water supply/sanitation; traditional/in their culture/part of their religion to have large families; 	1); ırses (max 1););
	(iv)	 Ideas such as: Poverty; people do not have enough resources; pressure on energy supplies (or example)/strain on utilities e.g. lack of work; inadequate food supplies/malnourished/starvation; poor access to education/government spend more on education poor access to health care/government spend more on healther overcrowded housing/homeless/shanty towns develop; inadequate water supply/sanitation/government spend more on sanitation; overuse of agricultural land/overgrazing; deforestation/loss of natural vegetation/habitats; increase in specified pollution type (Max 1) etc. 	g. gas or elec on; care;	stricity;
	(b) (i)	 Ideas such as: uneven distribution; many people live near/densely populated near Lake Victoria/ir many in/densely South West/near Rwanda border; many close to capital city/Kampala/close to cities (urban area) many along river between lake Victoria and Lake Kyoga; few/sparsely populated in NE/North of country; few/sparsely populated near South Sudan border/Northern Ke 	n South;); enyan border	, ,

any appropriate latitude and longitude with corresponding dense/sparse/many/few reference (Max 1);
 (3 × 1 mark) [3]

Page 3	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

(ii) Ideas such as:

- more likely to live on flat land;
- people are more likely to live in lowland areas/avoid living in mountains/live in a valley;
- people live in areas of temperate climates/where it is wet/warm;
- people avoid areas which are too hot/too dry/too cold/areas with extreme climate conditions;
- flood plains are avoided;
- swampy areas are not built on;
- in tropical areas higher land is attractive to live in as temperatures are lower;
- large areas of rainforest are sparsely populated;
- people live near a water source/rivers/nodal points for rivers/where rivers meet;
- people live near fertile soil;
- defensive sites e.g. surrounded by mountains/meander/on a hill;
- dry desert areas are avoided/have few people;
- near to natural resources/fossil fuels/minerals; etc.

NB: development is likely to be explanation e.g.as mountains/steep slopes are difficult to build on (dev) or need fields to graze cattle/grow crops; etc.

Max 1 development mark for each idea.

No double credit for opposites.

 $(5 \times 1 \text{ mark or development})$ [5]

Page 4	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail which describe and/or explain recent changes in population structure.

<u>Level 2</u> (4–6 marks) Uses named example.

More developed statements which describe and/or explain recent changes in population structure.

(NB Max 5 if no named example)

Level 3 (7 marks)

Uses named example. Comprehensive and accurate statements describe and explain recent changes in population structure, including some place specific reference.

Content Guide:

Answers will depend on country chosen but most are likely to refer to;

- ageing population,
- reducing proportion of young dependents;
- increasing proportion of elderly
- male/female imbalance
- migration ideas; etc.

place specific reference is likely to consist of: named parts of the chosen country/locational detail, population data etc.

NB: do not combine simple description and explanation for level 2.

[7]

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11
2 (a) (i)	Apatzingan/ Los Reyes/Nueva Italia/Patzcuaro/Zacapu/Zamora	(1 mark)	[1]
(ii)	A. An area of countryside with scattered buildings/houses/separate area where houses/services are separated/outside city;	· · · ·	-
	NB: need both dispersed idea and rural location for mark.		
	B. A built up area/town/city/area with high population/high density people live there/industrialised area;	buildings/lots (2 × 1 mark	
(iii)	 Ideas such as: flat land/room for expansion; industry/factories/businesses; markets for surrounding area/trade from surrounding area; migration (from surrounding rural area); commercial/retail development; mining/raw materials/extraction of resources; meeting of roads/route centre/transport links meet together; central location; etc. 	(3 × 1 mark) [3]
(iv)	 (iv) Ideas such as: It is typical of a hierarchy – reserve 1 mark; there are more small settlements/low order than large ones/high ord larger settlements are further away from each other than small ones 		, <u> </u>
	 are closer together; there is only one settlement over 200 000 but there are 9–11 s to 20 000 people or 38–40 settlements between 2501 and 100 alternatively could provide comparative examples of distances NB: Statistics must be comparative or could use terms such a most/least/many/few; 	000 people; s;	
(b) (i)	 Ideas such as: travel more varied distances for shops; e.g. 0.5km to 25 km for shops compared with 20–23 km for leis generally travel further for leisure/don't travel as far for shoppi a valid comparison e.g. meat and cinema; anomaly is furniture as travel up to 25kms but must refer to distance 	ng;	etc.
	NB: Must be comparative		

Page 6	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

- (ii) Ideas such as;
 - travel further for high order goods;
 - it depends on the availability of the services;
 - e.g. there are lots of shops selling bread (dev);
 - so people will be able to buy it locally (dev);
 - main leisure facilities may only be found in large urban areas;
 - so have to travel to a nearby city to go to cinema (dev);
 - for some goods people go further so they have a better choice/a wider variety of goods in some shops;
 - travel further for a better quality product;
 - General frequency of use idea e.g. don't go there very often so will travel further;
 - travel further for a specialized shop not found near where they live;
 - travel further for cheaper prices;
 - travel further for expensive goods e.g. car; etc

NB: Any example used properly is acceptable for development.

 $(5 \times 1 \text{ mark or development})$ [5]

(c) Levels marking

<u>Level 1</u> (1–3 marks) Statements including limited detail which describe location and/or sphere of influence of a shop or service.

<u>Level 2</u> (4–6 marks) Uses named example.

More developed statements which describe location and/or sphere of influence of a shop or service.

(NB Max 5 if no named example)

Level 3 (7 marks)

Uses named example.

Comprehensive and accurate statements which describe location and sphere of influence of a shop or service.

Content Guide:

Answers will depend on example chosen, however reference may refer to location:

- within CBD,
- on specific street,
- road network,
- proximity other services etc.(7)

NB: Not looking for explanation

[7]

Mark Scheme	Syllabus	Paper			
Cambridge IGCSE – May/June 2015	0460	11			
Wet and dry bulb thermometer/hygrometer	(1 mark)	[1			
 use <u>relative humidity</u> table/chart; work out depression of wet bulb(2)/subtract wet bulb from difference between the two; read off figure at intersection of dry bulb and wet bulb dep 	dry bulb (8–6)/w pression figures (v				
	$(2 \times 1 \text{ mark})$) [2			
 so that air flows gently around them/they are not affected so they measure condition of air not ground; so they are a standard height above ground; so they are not affected by concrete; 	by the wind;

	<u>vel 1</u> atements including limited detail which describe the impacts of droug	-	1–3 marks]
	<u>vel 2</u> es named example.	[4	1–6 marks]
Мо	pre developed statements which describe the impacts of drought.		
(N	B Max 5 if no named example)		
	vel 3		[7 marks]
Co	es named example. Imprehensive and accurate statements which describe the impacts o ace specific information.	of drought, in	cluding
	ontent Guide: swers are likely to refer to: death, starvation, malnutrition, reduction of yields/loss of crops and livestock, forced migration, drying up of water courses, death of natural vegetation,		
•	impact on food chains/ecosystems etc		[7]
		[TOTAL:	25 marks]

Ρ	age 9	Mark Scheme	Syllabus	Paper
		Cambridge IGCSE – May/June 2015	0460	11
4	(a) (i	Wearing away/breaking down of land/cliffs by the sea/waves	(1 mark)	[1]
	(ii)	A = Cave/Notch B = (Natural) Arch	$(2 \times 1 \text{ mark})$	[2]
	(iii)	Headland drawn to show stage 3 with isolated stack; labelling of stack; reference to collapse of roof of arch either in text or on diagram;	$(3 \times 1 \text{ mark})$	[3]
	(iv)	 Ideas such as: <u>alternate</u> bands of hard and soft rock along coasts with bays hard rock resists erosion; hard rock forms headlands; soft rock easily eroded; soft rock form bays; differential erosion; 	and headlands (4 × 1 mark)	; [4]
	(b) (i	 Ideas such as: high; steep; overhanging/undercut; brown rock/red/rust coloured; large block at base/boulders at base; layers; jagged; crumbly appearance; bare rock; etc. 	(3 × 1 mark)	[3]
	(ii)	 hydraulic action; air in cracks compressed (dev); corrasion/abrasion; loose materials thrown at cliff by waves (dev); corrosion; rocks dissolved by chemicals in sea water (dev); undercutting; slumping/collapse; as cliff cannot take weight of overhanging section (dev) etc. 	rk or developm	ent) [5]

Page 10	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

(c) Levels marking

Level 1 (1–3 marks)

Statements including limited detail which describe features of coral reef and/or explain formation.

<u>Level 2</u> (4–6 marks) Uses named example.

More developed statements which describe features of coral reef and/or explain formation.

(NB Max 5 if no named example)

<u>Level 3</u> (7 marks) Uses named example. Comprehensive and accurate statements which describe features of coral reef **and** explain formation, including place specific information.

Content Guide:

Answers are likely to refer to:

- composition of coral,
- biodiversity,
- locational features,
- deposition of calcium carbonate,
- colonization etc.

NB: Accept name of coral reef as alternative to location for level 3.

Pa	ige 1	1	Mark Scheme	Syllabus	Paper
			Cambridge IGCSE – May/June 2015	0460	11
5	(a)	(i)	Manufacturing/making things/assembling things/factories	(1 mark)	[1]
		(ii)	E = 3		
		(")	F = 1		
			G = 2		
			All 3 correct = 2 marks 1 or 2 correct = 1 mark	(2 marks)	[2]
				(2 1110185)	[2]
		(iii)	Ideas such as:		
			 close to port/easy to export/easy to import resources; 		
			HEP/power/electricity supply/energy supplies;Rail transport;		
			 Large market in the area; 		
			Labour supply available;		
			• Mines;		
			Trees;	(0 1) [0]
			Water source with dam/lake; etc.	$(3 \times 1 \text{ mark})$) [3]
		(iv)	Two marks for likely changes and two further marks for		
			suggested reasons.		
			E.g. Increase in tertiary as people become more		
			skilled/people have more disposable income		
			for services		
			Increase in secondary as the country industrializes		
			further/MNCs set up factories etc.		
			Decrease in primary on resources get exhausted/		
			Decrease in primary as resources get exhausted/ as mechanization occurs on farms/as people move		
			to cities/better technology used on farms; etc.		
			ND: must state shange first _ sannet are dit researing without sha		
			NB: must state change first – cannot credit reasoning without cha	(2 × 2 mark) [4]
					/ [']
	(b)	(i)	Inputs = materials used in the factory/raw materials/primary goods	2.	
	(6)	(')	inputs - materials used in the factory/faw materials/primary good	,	
			Processes = Stages of production/convert raw materials into some	ething people	use;
			Outputs = final product/things that they make in the factory/to sell;		
				$(3 \times 1 \text{ mark})$) [3]
		(ii)	Accept any secondary industry e.g. steel making, sugar manufact		
		(11)	Accept any secondary industry e.g. steel making, sugar manulact	ur c , udis.	
			 mark reserved for an example and location example can be a location can be approached with area country. 	name of a c	ompany.

Location can be any scale, city, area, country.
4 marks for processes relevant to chosen example with development as appropriate.

 $(5 \times 1 \text{ mark or development})$ [5]

Page 12	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

(c) Levels marking

<u>Level 1</u> (1–3 marks) Statements including limited detail explaining location of high technology industry.

<u>Level 2</u> (4–6 marks) Uses named example More developed statements explaining location of high technology industry.

NB MAX 5 marks with no named example

<u>Level 3</u> (7 marks) Uses named example. Comprehensive and accurate answer explaining location of high technology industry including some place specific reference.

There will be likely reference to ideas such as:

- transport links
- labour supplies
- cost of land
- government incentives
- environmental attractions
- economies of agglomeration
- close to components
- market/demand
- close to universities etc.

[7]

Page 13	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11
6 (a)(i)	Record high summer temperatures (in the USA in 2011)	(1 mark)	[1]
(ii)	East coast earthquake (1 mark); earthquakes are not caused by climate/caused by tectonic action;		
		$(2 \times 1 \text{ mark})$) [2]
(iii)	 Ideas such as: burning fossil fuels/oil/coal; transport/cars/vehicles/trains/lorries; aviation/planes; generating electricity/power stations/using electronic devices/u units; cattle grazing; shipping; factories; deforestation; rice production; 		
(iv)	 land fill sites; etc. Ideas such as: melting of ice caps/glaciers; loss of habitats; threat to/extinction of species; impact on food chains; loss of biodiversity; flooding of <u>coastal</u> area/rising sea levels; some area will become drier/desertification occurs/more droug crop production will be reduced/more starvation; more incidence of weather related hazards/(eg floods/storms); tropical insects/mosquitos may spread to other areas; loss of life due to higher temperatures/coral reefs bleached due 	;	/ - -
	temperatures; etc.	(4 × 1 mark) [4]
(b) (i)	Candidates can choose any source from Fig. 11 (no mark). Credit ideas relevant to chosen source.		
	E.g. transport: burns fossil fuels; which give off gases/CO ₂ or other named examples; noise from engines/horns; etc.	(3 × 1 mark) [3]

Page 14	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0460	11

(ii) Candidates can choose any type of pollution from Fig.11 except for Visual as the question refers to the environment not people (no mark for selected example).

Credit ideas relevant to chosen type.

E.g. water pollution:

- Nutrients change composition of water;
- Growth of algae;
- Lowering of oxygen supply;
- Eutrophication (dev)
- Kills fish;
- Predators have no food (dev);
- Destruction of food chain/ecosystem etc. (5 × 1
- $(5 \times 1 \text{ mark or development})$ [5]

(c) Levels marking

<u>Level 1</u> (1–3 marks) Statements including limited detail which describe attempts to maintain, conserve or improve the natural environment.

<u>Level 2</u> (4–6 marks) Uses named example.

More developed statements which describe attempts to maintain, conserve or improve the natural environment (NB Max 5 if no named example)

Level 3 (7 marks)

Uses named example.

Comprehensive and accurate statements which describe attempts to maintain, conserve or improve the natural environment including some place specific reference.

Content Guide:

Answers are likely to include reference to:

- legislation,
- national Parks,
- nature reserves,
- specific measures (e.g. tree planting) etc
- eco-friendly transport
- fines for littering

[7]
