## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

## MARK SCHEME for the May/June 2006 question paper

## **0653 COMBINED SCIENCE**

0653/02

Paper 2, maximum raw mark 80

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks.

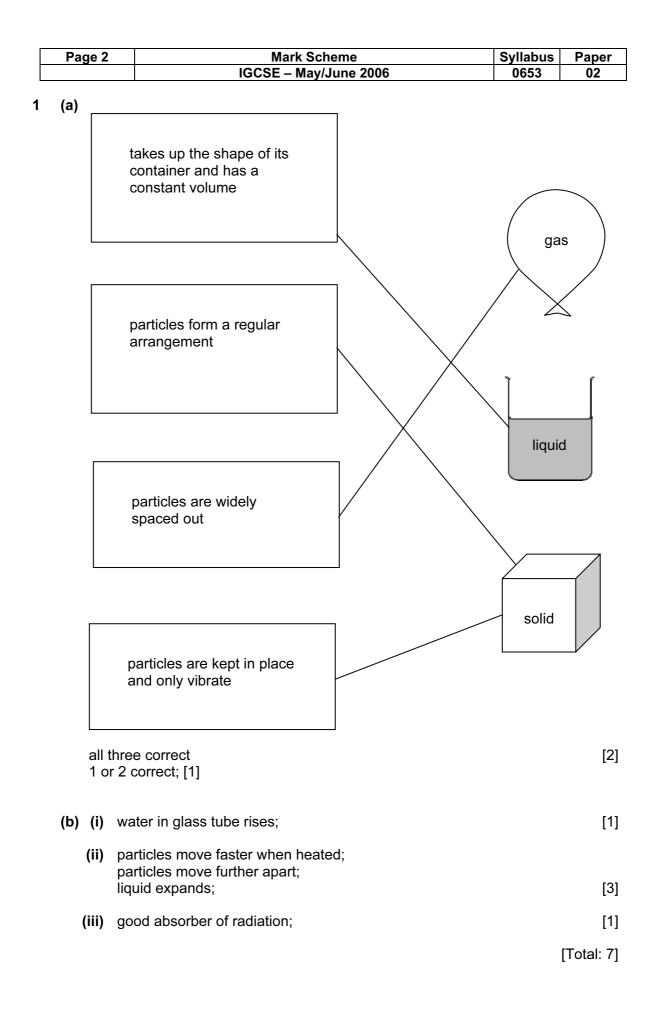

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

The minimum marks in these components needed for various grades were previously published with these mark schemes, but are now instead included in the Report on the Examination for this session.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2006 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 3		Mark Scheme	Syllabus	Paper
			IGCSE – May/June 2006	0653	02
2	(a)	X amni Y uteru Z cervi	is ;		[3]
	(b)	•	nother's) blood ; n placenta ;		[3 max]
	(c)	becaus chemic	g during pregnancy may result in low birthweight ; e baby gets less oxygen ; als from smoke pass through placenta ; ref to nicotine / carbon monoxide ;		[2 max]
					[Total: 8]

	Page 4					Mark Scheme	Syllabus	Paper
						IGCSE – May/June 2006	0653	02
3	(a)	(i)	3 4 5	(C <i>l</i> ) (Br) (I)	gas liquid solid ;;	(1 for numbers and 1 for states)		[2]
	(	(ii)	gas	S;				[1]
	(b)	(i)	cov	/alent;				[1]
	(	(ii)	two	brom	nine atom	s/ions for every one magnesium atom/io	n (owtte);	[1]
	(c)	(i)	chl	orine /	oxygen	<sup>/</sup> ozone;		[1]
	(	(ii)	people drinking the water may become ill / be poisoned / harmed; because the water may contain harmful microorganisms; chlorine sterilises the water / kills harmful microorganisms;				[2 max]	
								[Total: 8]

	Page 5			Mark Scheme	Syllabus	Paper
				IGCSE – May/June 2006	0653	02
4	(a)	(i)	Ge	iger muller tube/Geiger counter etc;		[1]
		(ii)	cor	ncrete or lead shielding/radiation badges/minimal expos	ure times	[max 2]
	(b)	(i)		oms/molecules are ionised; at it does to materials		[2]
		(ii)		uses cancer; mage to cells;		[2]
	(c)	hea stea turb	am;	, ,		[3]
	(d)	(i)	-	h voltage means low current; s reduces energy losses;		[2]
		(ii)		sisitance = voltage/current; 220 10 = 22 ohms		[2]
					ר]	Fotal: 14]

	IGCSE – May/June 2006	0653	02

5 (a) nucleus A cell wall C chloroplast none (allow A)

cell surface membrane B

all correct three marks three correct two marks two correct one mark

two correct one mark[3](b) (i) root hair ;[1](ii) large surface area ;[1](iii) carbon dioxide + water  $\rightarrow$  sugar / glucose / starch + oxygen ;;[2](iv) lost, as water vapour / through stomata / by transpiration ;[1]

[Total: 8]

				IGCSE – May/June 2006	0653	02
6	(a)	carl hyd		•		[2]
	(b)	(i)	he	at / light;		[1]
		(ii)	ca	rbon dioxide / water;		[1]
	(c)	(c) A is polymer; polymers are very large molecules / have very large numbers o owtte;				onded / [2]
	(d)	(i)	1;			[1]
		(ii)	ref	erence to (avoidance of ) formation of sulphur dioxide; erence to reduced effects e.g. less acid rain; erence to reduced impact on health issues;		[3]
					[]	Fotal: 10]

	Page 8		Mark Scheme	Syllabus	Paper
			IGCSE – May/June 2006	0653	02
7	(a)	root	es / plants, stop rain hitting the ground (hard) ; s hold soil in place ; icing stops water running down slopes ;		[2 max]
	(b)	if all only	) that species diversity is the number of species sugar cane then only one kind of plant ; one kind of habitat ; ew different species of animals ;	present ;	[2 max]
	(c)	(i)	by diffusion ; through wall of alimentary canal ; in small intestine ; ref. to villi ;		[2 max]
		(ii)	pancreas ; secretes insulin ; causes, cells / liver, to take glucose from the b	ood ;	[3 max]
		(iii)	needs sugar for respiration ; to provide energy ;		[2]
				ד]	otal: 11]

	IGCSE – May/June 2006	0653	02

- 8 (a) (i) element made of only one <u>type</u> of atom and compound contains different atoms bonded together; element cannot be simplified and a compound can be broken into its elements / is made from different elements; [1 max]
  (ii) iron oxide reduced; any correct reference to reductive processes e.g. oxygen removed / positive ions gaining electrons; [2]
  - (b) (i) carbon / manganese / other correct;
    - (ii) (zinc applied as) a barrier (between steel and environment) / owtte; prevents reaction between steel / iron and oxygen (in environment); prevents reaction between steel / iron and water (in environment); (allow correct reference and detail of sacrificial protection)
  - (c) iron sulphate; zinc sulphate;

[2]
