MARK SCHEME for the October/November 2008 question paper

0653 COMBINED SCIENCE

0653/03

Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

UNIVERSITY of CAMBRIDGE International Examinations

| Page 2 | Mark Scheme | Syllabus | Paper |
|---|---|-------------------------|------------|
| | IGCSE – October/November 2008 | 0653 | 3 |
| 1 (a) (i) ener | rgy (transfer) ; | | [1] |
| (ii) ener deta not e | gy lost between, organisms / levels / links in the cha il of how it is lost ; enough energy available to support, fifth link / preda | ain ; tor of hawks ; | [max 2] |
| (b) respiration releases carbon d photosyn combines (produce <i>alternativ</i> insect die respiration | on (in insect) ; carbon dioxide (to the air) ; ioxide absorbed by plant ; othesis (in plant) ; s carbon dioxide with water ; es glucose) in chloroplast ; <i>ve starting point</i> : es and, is decomposed/decays ; on (of decomposers) ; | | |
| then poir | nts 2 onward as above | | [max 4] |
| | | | [Total: 7] |
| | | | |
| 2 (a) black sur of, radiat more hea | faces are better absorbers ; ion / heat ; at means, particles move faster / bigger temperature | e rise ; | [max 2] |
| (b) rays drav rays of lig | wn as straight lines ; ght come together to a focus ; | | [2] |
| (c) (up/dowr makes g | n) motion / kinetic energy, of waves ; enerator / dynamo / magnet in coil, turn (to produce | electricity) ; | [2] |
| (d) measure by using divide ma | mass and volume ; Eureka can / displacement method described ; ass by volume ; | | [3] |
| | | | [Total: 9] |

|---|---|-------|-----------------------------|--|----------------------|--------------|
| | | | | IGCSE – October/November 2008 | 0653 | 3 |
| 3 | (a) 12 proto electron | | orotor trons | ns labelled and 12 neutrons labelled ; s shown in three energy levels 2, 8, 2 ; | | [max 2] |
| | (b) | (i) | mag (maę | nesium <i>ions</i> (are involved) ; gnesium ions) gain two electrons each ; | | [2] |
| | | (ii) | refer are r | ence to charge balance / two negative charges on t needed to balance the double positive on magnesiu | wo chlorides m ; | [1] |
| | (c) | (i) | mag elect | nesium (atoms), become positive ions / lose electro tron loss is oxidation ; | ns ; | [2] |
| | | (ii) | H⁺ ic the l | ons are reacting / concentration of H^+ ions is decreas ower the H^+ concentration the higher the pH ; | sing / hydrogen is l | ost ; [2] |
| | | | | | | [Total: 9] |
| 4 | (a) | (i) | A ur B bla | ethra ; adder ; | | [2] |
| | | (ii) | C – 0 D – 1 | carries urine (from kidneys to bladder) ; makes sperm ; | | [2] |
| | | (iii) | X on | sperm duct ; | | [1] |
| | (b) if environment cha example – disease some individuals n because they have can breed and pas | | | ment changes ; – disease / predator / change in climate ; lividuals may survive / not all will be killed ; they have advantageous characteristics ; d and pass on these characteristics to their offspring | g; | |
| | | idea | that | genetic disease may not be passed to offspring ; | | [max 3] |
| | | | | | | [Total: 8] |

| | Page 4 | | | Mark Scheme | Syllabus | Paper |
|---|--------|---|---------------------|---|----------|------------|
| | | | | IGCSE – October/November 2008 | 0653 | 3 |
| 5 | (a) | (i) crude oil / petroleum (extracted from Earth); oil is, refined / made into simpler mixtures; by fractional distillation; oil is heated; different products, distil / are collected, according to boiling point / at different positions; | | | [max 2] | |
| | | (ii) | (13) = <u>18</u> | x 12)+ (28 x 1); <u>34</u> ; | | [2] |
| | (b) | (i) | gas | S because it is oxygen ; | | [1] |
| | | (ii) | carb resu | oon / soot ; Ilts from incomplete combustion ; | | [2] |
| | | (iii) | refer toxic | rence to carbon monoxide / nitrogen dioxide ; c / detail e.g. (CO) attaches to haemoglobin ; | | [2] |
| | | | | | | [Total: 9] |
| 6 | (a) | wor 55 s | king ; plus | ; s or minus 2 ; | | [2] |
| | (b) | sam | ne nu | Imber of protons but different number of neutrons ; | | [1] |
| | (c) | dangerous when, ingested / breathed in / inside the body ; highly ionising ; because, large mass / large charge / large particle / is helium nucleus ; removes electrons ; damages DNA / causes mutations ; | | | | |
| | | des | ses c troys | / damages, cells ; | | [max 4] |
| | | | | | | [Total: 7] |

| | Page 5 | | | Mark Scheme | Syllabus | Paper |
|---|--------|----------------------|---------------------------|---|---------------------|--------------------|
| | | | | IGCSE – October/November 2008 | 0653 | 3 |
| 7 | (a) | kee inte anc | ping rnal e other e | constant / keeping stable / maintaining ; environment / environment of cells / conditions in the example, e.g. temperature / water / salt ; | e body ; | [max 2] |
| | (b) | (i) | insu | lin ; | | [1] |
| | | (ii) | affeo whic store | cts liver ; ch removes glucose from the blood ; es it as glycogen / glucose converted to glycogen ; | | [max 2] |
| | (c) | higl (cel so v | ner co II) me water | oncentration (of sugar) outside cell than inside ; mbrane is partially permeable ; moves out of cells ; | | |
| | | cell | s, sho | ort of water / shrink / dehydrated ; | | [max 2] |
| | (d) | (i) | a lot lenti less | of, energy / calories / kilojoules, in fat ; ls and rice mostly, carbohydrate / starch ; energy <u>per gram</u> in carbohydrates than fat ; | | [max 2] |
| | | (ii) | fatty builc bloc | diet linked to development of (coronary) heart disea d up of cholesterol in <u>arteries</u> ; kage of <u>coronary artery</u> ; | ase ; | |
| | | | stop hear | s oxygen getting to heart (muscle) ; t <u>muscle</u> stops working ; | | [max 2] |
| | | | | | | [Total: 11] |
| 8 | (a) | | B, C A ; | or D ; | | [2] |
| | (b) | (i) | calci | ium carbonate \rightarrow calcium oxide + carbon dioxide; | | |
| | | | all fo CaC | formulae in equation match words and are correct; $O_3 \rightarrow CaO + CO_2$; | | [3] |
| | | (ii) | lime | water / calcium hydroxide (solution), goes cloudy; | | [1] |
| | | (iii) | add if (m | (dilute) acid / heat further ; ore) gas is produced then not all calcium carbonate h | nas reacted / ora ; | [2] |
| | | (iv) | soil exce | is too acidic / pH too low (for the intended crop ess acid / neutralises ; |)/calcium carbonate | reacts with [1] |
| | | | | | | [Total: 9] |

| | Page 6 | | | Mark Scheme Syllabus | | Paper | |
|---|--------|------|--------------|---|-----------------------|-------------|--|
| | | | | IGCSE – October/November 2008 | 0653 | 3 | |
| 9 | (a) | (i) | 6Ω; | and 4Ω in series ; | | [1] | |
| | | (ii) | 6Ωa | and 6Ω ; | | | |
| | | | 1/R | = 1/6 + 1/6 = 2/6; | | [3] | |
| | (b) | (i) | incre | ease magnetic field ; | | | |
| | | | incre | ease number of turns ; | | [max 2] | |
| | | (ii) | sine | wave above and below x axis ; | | | |
| | | | (app five | waves ; | | [3] | |
| | (c) | con | itract, | in winter/when cold ; | | | |
| | | cab | les p | ulled closer together / explanation of damage cause | d / increased tension | ; [2] | |
| | | | | | | [Total: 11] | |
