MARK SCHEME for the May/June 2010 question paper

for the guidance of teachers

2217 GEOGRAPHY

2217/22 Paper 22 (Investigation and Skills), maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

				GCE O LEVEL – May/June 2010	2217	22					
	Section B										
7	(a)	(i)		<u>ethod</u> : Stratified sampling/Systematic Sampling/Random (1) OR description instead g. ask every 5 th person, use random numbers (1)							
			To g	ualified/reason: o get an appropriate gender balance (1)							
				To get an appropriate age balance (1) To avoid bias/fair test/valid. (1)							
		(ii)		er to deal with data if there is only four classifications/ons that respondents don't have to disclose their exact		helpful (1)					
				Quicker. Easier must be qualified	0, , , ,	[2 @ 1 = 2]					
		(iii)	Whe How Whe How	<u>NOT Why did you come to this town or similar? Must be about MIGRATION</u> Where did you come from?/Where were you born? (1) <u>NOT Were you born here?</u> How long have you lived in this city? (1) When did you move to the city? (1) How old were you when you migrated? (1)							
			Did you migrate alone or with family/friends? (1) How did you travel to the city when you migrated here? (1)								
	(b)	(i)		<u>ticks/crosses</u> . Accurate completion of Fig. 2 error = minus 1 mark; Two or more = 0		[2 @ 1 = 2]					
		(ii)	To check that the questionnaire was producing appropriate answers (1) To check that everyone was completing the questionnaire in the same way/to compare progress so far (1) To agree methodology/To change methodology if not working/To improve method (1) Don't want to do all 25 questions each and then find out that the methodology is incorrect or has been applied in different ways (1) [2 @ 1 = 2]								
	(c)	(i)	1 ma	<u>ticks/crosses</u> . Pie graph completion ark for plotting dividing line accurately at 95% or 91% ark for shading sectors – <u>both</u> must be correct		[2 @ 1 = 2]					
		(ii)		othesis is incorrect/partially correct Tick HA Credit Dat	<u>a = 1 max but no</u>	t compulsory.					
			X if hypotheses stated as correct. Biggest group/highest number of residents came to the city in search of a but this group is only 36 out of 100 respondents (1) Most people came to the city for different reasons (1) 64/100 (1)								
			Man	y people also moved for educational reasons (1) with 3	32/100 (1)	[1 + 2 = 3]					
	(d)	(i)		graph completion: Use ticks/crosses. Dom. servants 1 arks for accurate bar plots; <u>ignore width and shading</u> .	5; plumbers 8.	[2 @ 1 = 2]					
		 (ii) <u>Hypothesis correct (Tick HA) Data can be credited if supports H.</u> The biggest groups had paid jobs e.g. shop owner, domestic help, rickshaw driver (1) because 73 of 100/70–75%/estimate ³/₄ respondents had paid jobs (1) Minority did not have paid jobs (unemployed, student, housewife) (1) with 27/100. (1) [2 @ 1 = 									

Page 6	Mark Scheme: Teachers' version	Syllabus	Paper							
	GCE O LEVEL – May/June 2010	2217	22							
(e) NO MARK FOR Hypothesis; 1 reserve for Data; then 2 others. Written statements must be comparative; data should be compared as pairs. <u>Hypothesis is correct</u> in that all 100 respondents (1) earned less when compared with the average income for the city in Uttar Pradesh (1) <50 000 with 54 000 (1) <u>Hypothesis partly correct</u> because 27 out of 100 (1) had very low incomes compared with the city average (1) <20 000 with 54 000 (1) but some of the rest will be above Uttar Pradesh in the 20 000–50 000 category. (1) <u>Hypothesis incorrect</u> because <u>compared</u> with the population of India as a whole man respondents <u>probably</u> earned above the national average (1) of 24 000 with 73/100 in 20 000–50 000 (1)										
Did	attempt to get a balanced sample/fair test. (1) not want to get too many men/women or old/young (1) erent patterns between male/female; age. (1)		[1]							
Mor Mor The The On	et relate to age/gender re men than women moved to the city (1) re old than young moved to the city (1) age of the migrants influences the jobs they have (1) gender of the migrants influences the jobs they have (average men earn more than women (1) average young earn more than old (1)	1)	[1]							
Ear Res Inco Har	pondents may not want to divulge personal information nings may be informal/not paying tax (1) pondents might be suspicious of why asked/use of dat ome may vary/may not know what it is (1) der to categorise/graph (1)									
(g) <u>MUST E</u> plus 3 f <u>NO MAF</u> e.g. Hea	/ lie/be ashamed (1) <u>BE RELEVANT/OTHER</u> i.e. not age/gender/jobs/migrat <u>or fieldwork OTHER than questionnaire – 0 if sugges</u> <u>RKS IF CHOICE IS INAPPROPRIATE</u> alth/sanitation or quality of houses/quality of environmentity ity of services such as electricity. drinking water:	st asking question								

availability of services such as electricity, drinking water; Carry out investigation by taking photographs, Keep a diary, Make a blog, video etc. <u>NOT Quality of life.</u> Credit detail of suggested methods
